Office Action Summary	Application No. 10/581,085	Applicant(s) TAKAHASHI ET AL.	
	Examiner JAMES MARTINELL	Art Unit 1634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1634

Regarding the amendment filed September 2, 2011, the claim identifier for claim 6 is incorrect. The claim identifier should be "(Currently Amended)".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4, 6-20, and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague, indefinite, and incomplete.

- (a) The recitation of "culturing a first sample of a gene-disrupted strain of a yeast in the presence of the test specimen, culturing a second sample of the gene-disrupted strain of the yeast; and comparing cell response of the first sample with cell response of the second sample" (claims 6-20) is vague, indefinite, and incomplete because it is not clear whether the culturing of the second sample is in the absence of the test specimen. This part of this rejection may be overcome by changing "culturing a second sample of the gene-disrupted strain of the yeast" to "culturing a second sample of the gene-disrupted strain of the yeast in the absence of the test specimen".
- (b) The recitation of "a gene to be disrupted" (claim 6) is incomplete because there is no antecedent basis for the phrase. The gene is already disrupted. Changing "a gene to be disrupted" to "a disrupted gene" would be sufficient to overcome this part of this rejection.
- (c) The recitation of "the gene to be disrupted" (claims 7-20) is incomplete because there is no antecedent basis for the phrase. The gene is already disrupted. Changing "the gene to be disrupted" to "the disrupted gene" would be sufficient to overcome this part of this rejection.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-4, 6, and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Roemer et al (U.S. Patent Application Publication 2003/0180953). Roemer et al teaches methods for determining the presence of chemicals in culture media by using yeast that express lower than normal amounts particular gene products because of the inactivation of one copy of the gene in diploid yeast cells (*e.g.*, see paragraphs 0178-0190 and claims 28 and 31). The methods of the instant claims embrace the methods and compositions of the reference.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (571) 272-0719.

The examiner works a flexible schedule and can be reached by phone and voice mail. Alternatively, a request for a return telephone call may be e-mailed to james.martinell@uspto.gov. Since e-mail communications may not be secure, it is suggested that information in such requests be limited to name, phone number, and the best time to return the call.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave T. Nguyen, can be reached on (571) 272-0731.

OFFICIAL FAX NUMBER

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300. Any Official Communication to the USPTO should be faxed to this number.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
